

Aggressive Portfolio

30th November 2017

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Aggressive portfolio seeks high capital growth over the long term. The portfolio aims to exceed long term equity returns at lower than equity levels of

volatility. The portfolio is expected to be exposed to market cycles and significant short-term fluctuations in value. While the portfolio may offer significant capital

growth opportunities there is also a high risk of capital loss over the short and medium term.

Market Comment

Considering we saw the first rise in UK interest rates in a decade and uncertainty over Brexit dominating the news November was an uneventful month for investors. Many equity indices recorded losses, especially in sterling terms, as investors consolidated recent gains, but the positive trend continued in Japan and

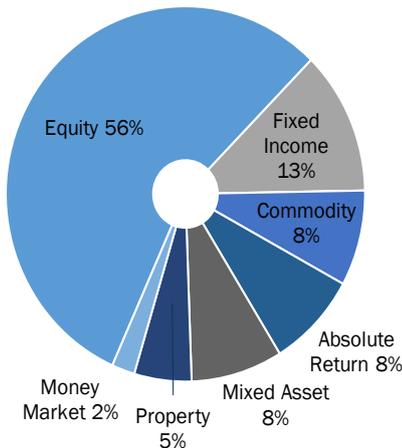

the US where gains were strong enough to offset any currency losses. Surprising many, Gilts gained value as expectations of further interest rate rises were diminished by the Bank of England. Overall the portfolio recorded a modest loss as sterling strength effected the position we hold in Enhancer assets. December

is often a positive month for investors, so we are hopeful of a positive end to a positive year. That said with valuations remaining high we remain defensively positioned going into what we expect to be a challenging 2018.

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk.

Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

- Notes:
- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee.
 - The 'Actual' data includes the highest ever OCF and loss and the annualised total return and volatility since inception on June 30, 2016
 - The fees quoted are based on the current portfolio weightings using the latest available OCF data of each fund. The yield is not guaranteed.
 - The current loss is calculated as the replicated loss from the previous month end highest portfolio value. Intra month or daily data may exceed this.
