

Balanced Income Portfolio

31st March 2018

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Balanced Income Portfolio targets an income of 4.0% by diversifying across a broad range of assets with differing return and volatility profiles. After Income, the portfolio is expected

to maintain real value after inflation while minimising the possibility of the investment falling in value. The typical investor seeks consistent income from their investment but is able to accept a

moderate level of risk for the potential of higher income. They recognise that their capital is at risk and that its value may fluctuate.

Market Comment

Concerns regarding rising protectionist policies put further pressure on global equity indices during March. Fixed income, despite concerns over rising interest rates, offered some protection to investors as government bonds rallied. Property and some commodities, mainly energy related, gained value but overall it was another

challenging month for the portfolio. With many equity indices now down nearly 10% from early January highs, and more attractively priced on a valuation perspective, we added some Enhancer risk to the portfolios at the end of the month. The portfolio remains cautiously positioned as we expect volatility to continue in the coming

months. That said, with fundamental economic indicators remaining positive, and provided protectionism does not escalate, we would again welcome further opportunity to further increase portfolio risk exposure.

Key Objectives	Target	Actual ²	Performance (%) ¹	1 mth	3 mth	6 mth	YTD	1yr	S/I
Annualised Return ²	5.0-6.0%	10.8%	Rivers Balanced Income	-1.14	-2.77	-1.39	-2.77	-0.16	10.75

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee.
- The 'Actual' data includes the highest ever OCF and loss and the annualised total return and volatility since inception on June 30, 2016
- The fees quoted are based on the current portfolio weightings using the latest available OCF data of each fund. The yield is not guaranteed.
- The current loss is calculated as the replicated loss from the previous month end highest portfolio value. Intra month or daily data may exceed this.

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.
"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.
"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.
