

Cautious Portfolio

30th April 2019

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Cautious Portfolio targets a return in excess of inflation by diversifying across a broad range of assets with differing return and volatility profiles.

The portfolio targets a return 3-4% above inflation while minimising the possibility of the investment falling in value. The Cautious portfolio investment

value may fluctuate in the short term, but we would not expect significant fluctuations in value over a sustained period.

Market Comment

April was another positive month for investors as equities values continued to appreciate. European and US equities gained the most with Asian and Emerging Markets lagging but still positive. Anchor assets, particularly Gilts, lost some of their gains year to date but

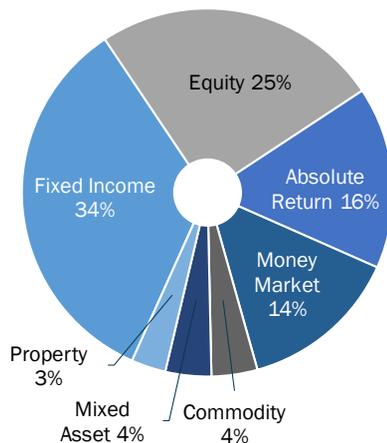

overall investment sentiment continued to be positive. Despite the defensive allocation across the portfolio returns were positive and look strong year to date. Looking forward we expect the high valuations in some sectors to be challenged particularly if corporate

earnings disappoint in the coming weeks. The portfolio is well positioned as we approach the summer.

Key Objectives	Target	Actual ²	Performance (%) ¹	1 mth	3 mth	6 mth	YTD	1yr	S/I

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee.
- The 'Actual' data includes the highest ever OCF and loss and the annualised total return and volatility since inception on June 30, 2016
- The fees quoted are based on the current portfolio weightings using the latest available OCF data of each fund. The yield is not guaranteed.
- The current loss is calculated as the replicated loss from the previous month end highest portfolio value. Intra month or daily data may exceed this.

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk.

Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.
