

Balanced Portfolio

31st July 2020

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Rivers Balanced Portfolio targets moderate long term returns above inflation, and after fees, at volatility levels considerably below those expected in equities. The portfolio aims to achieve its objective by maximising diversification across a range of assets. The portfolio will be moderately exposed to global equity market cycles. The typical investor seeks capital growth from their investment and can accept a moderate level of risk for the potential of higher returns.

Market Comment

Overall the portfolio return was positive during July as Anchor and Diversifier assets offset the moderate losses in most Enhancer asset valuations. The impressive rally in Enhancer assets slowed during the month, particularly for UK investors. Currency fluctuations affected UK equity values and offset continued gains in US equities. Within Enhancers corporate bonds, credit and emerging market equities added value. Most developed market equities, in sterling terms at least, saw losses but remain significantly ahead over the last 3 months. Gold and inflation linked bonds were positive contributors to the portfolio as concern about the inflationary pressures from supply side constraints and central bank intervention escalated.

Performance (%) ¹	1m	3m	YTD	1yr	3yr
Rivers Balanced Portfolio	0.68	7.29	3.60	3.89	17.11
IA Mixed 20%-60% Shares	0.42	4.65	-3.66	-2.25	4.60

Quarterly	Q1	Q2	Q3	Q4	Total
2016	-	-	7.30%	2.58%	10.07%
2017	-	0.00%	1.57%	2.55%	4.16%
2018	-2.26%	3.39%	1.50%	-4.29%	-1.83%
2019	5.00%	3.45%	2.21%	0.14%	11.17%
2020	-9.59%	13.81%	-	-	2.89%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk.

Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

1. The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee and annualised since inception (June 30th 2016)
2. Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30th 2016)
3. The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
4. The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
5. The yield is the average yield as published by each fund and not guaranteed
6. Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity
7. Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral

Model Characteristics	Target	Current
