

Aggressive Portfolio

31st December 2020

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Rivers Aggressive Portfolio seeks high capital growth after fees over the long term. The portfolio aims to exceed long term equity market returns at lower levels of volatility. The portfolio will be significantly exposed to global equity market cycles and significant short-term fluctuations in value should be expected. While the portfolio may offer significant capital growth opportunities there is also a high risk of capital loss over the short and medium term.

Market Comment

The portfolio finished the year with positive performance in December and above target returns for 2020 overall. All asset classes were positive with Enhancers once again producing most of the gains. The approval of an effective vaccine against Covid-19 significantly boosted investor sentiment. Despite rising infection rates across Europe and in the US, the hope of a return to normality within months raised confidence. In the UK, the equity market, still below pre-pandemic levels, rallied strongly as news of the vaccine, and a comprehensive ongoing trade deal between the UK and EU became clear. The portfolio remains cautiously positioned as the outlook for 2021 looks more precarious than current equity valuations indicate.

Performance (%) ¹	1m	3m	YTD	1yr	3yr
Rivers Aggressive Portfolio	2.75	7.35	11.95	11.95	23.73
FTSE All Share	3.86	12.62	-9.82	-9.82	-2.71

Quarterly	Q1	Q2	Q3	Q4	Total
2016	-	-	8.71%	3.89%	12.94%
2017	5.75%	0.53%	1.88%	3.59%	12.19%
2018	-3.84%	5.07%	1.61%	-6.66%	-4.17%
2019	6.38%	4.94%	1.73%	1.55%	15.33%
2020	-13.87%	17.43%	3.11%	7.35%	11.95%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk.

Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee and annualised since inception (June 30th 2016)
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30th 2016)
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral

Model Characteristics	Target	Current
