

Adventurous Portfolio

28th February 2021

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Rivers Adventurous Portfolio seeks capital growth, after fees, as its primary objective whilst maintaining a moderate constraint over overall short-term volatility. The portfolio aims to achieve its objective by diversifying across a broad range of global assets with differing return and volatility profiles. The portfolio will be exposed to global equity market cycles. Fluctuations in the value of the portfolio should be expected in order to achieve greater potential returns over the longer term.

Market Comment

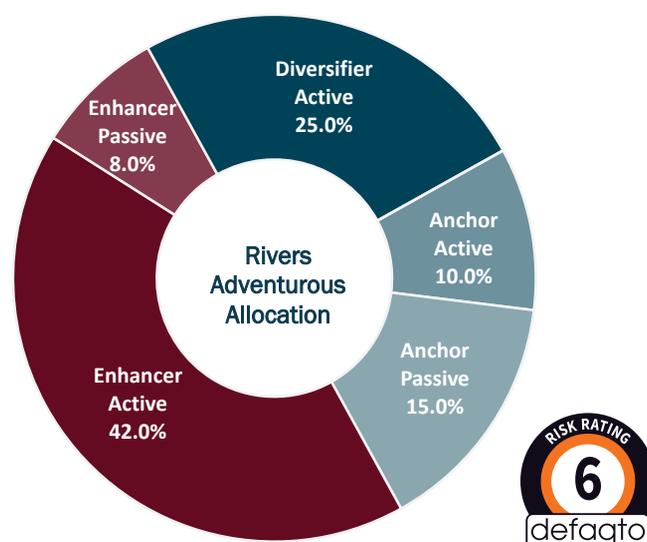

Asset price volatility continued in February as inflation concerns met rising confidence and positive vaccine news. Anchor assets suffered as interest rates for Gilts increased significantly. Among 'Diversifiers', commodity and property prices rose significantly but unusually this did not translate into gold prices, which had their largest price decline since the pandemic started. For 'Enhancers', UK and Emerging Market equities added value but Sterling strength more than offset the returns from other developed market equities. In the middle of the month, the portfolio was rebalanced decreasing overall US equity exposure but maintaining the overall underweight 'Enhancer' allocation. We believe risk remains elevated and await more favourable opportunities to add risk.

Model Characteristics	Target	Current
Annualised Return ¹	6.0-8.5%	8.7%
Portfolio Volatility ²	<13.0%	7.8%
Maximum Loss ³	<15.0%	-10.9%
Ongoing charge of underlying ⁴	<0.75%	0.64%
Number of holdings	<25	19
Last rebalance date	-	Feb-21
Current expected portfolio yield ⁵	-	1.24%
Classified 'Passive' investments ⁶	40%	23.0%
Since Inception Total Return	-	47.85%

Allocation	Strategic	Current	Tactical

2019	5.60%	3.84%	2.06%	0.25%	12.19%
2020	-10.13%	15.71%	2.47%	6.01%	12.96%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee and annualised since inception (June 30th 2016)
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30th 2016)
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral
