Aggressive Portfolio

30th June 2021

RIVERS CAPITAL MANAGEMENT

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Rivers Aggressive Portfolio seeks high capital growth after fees over the long term. The portfolio aims to exceed long term equity market returns at lower levels of volatility. The portfolio will be significantly exposed to global equity market cycles and significant short-term fluctuations in value should be expected. While the portfolio may offer significant capital growth opportunities there is also a high risk of capital loss over the short and medium term.

Market Comment

June saw further all time highs in US and European Equities. Despite continued spikes in inflationary indicators, both gold and inflation linked bonds lost value as investors continued to believe inflation is transitory and high valuations are justified.

UK equities underperformed compared to most other equity regions, which were boosted by a modest fall in sterling value. While property and commodities gained, the Diversifier allocation was impacted by the fall in gold over the month. During the first half of 2021, despite a defensive position, the portfolio added value. With valuations high, the portfolio is positioned to take advantage in any normalisation of asset prices and is protected against the continued risk from inflation.

Performance (%)[1]	1m	3m	YTD	1yr	3yr
Rivers Aggressive Portfolio	1.47	4.67	5.84	17.18	29.77

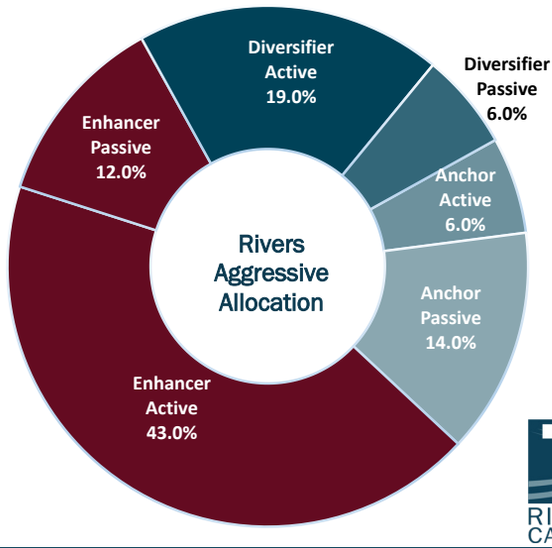
Diversifiers	15.0%	25.0%	**10.0%**



RIVERS CAPITAL

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk.

Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

1. The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25%+VAT Rivers Capital Management fee and annualised since inception (June 30th 2016)
2. Volatility is caculated as the annualised average weekly standard deviation of return since inception (June 30th 2016)
3. The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
4. The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
5. The yield is the average yield as published by each fund and not guareenteed
6. Rivers investment committee determines a Passive allocation target (20-60%) dependant on the percieved market opportunity
7. Relative risk level determined between 1 and 7 within the tactical contraints of all models with a level 4 considered tactically neutral
