

# Balanced ESG Portfolio

31<sup>st</sup> October 2021

INTELLIGENT INTUITIVE INVESTING

## Investment Objective

The Rivers ESG Balanced Portfolio targets long term capital growth in real terms and after fees. The portfolio invests only in solutions which pass strict criteria of Environmental, Social and Governance (ESG) requirements. The portfolio will be moderately exposed to global equity market cycles. The typical investor seeks capital growth from their investment and is able to accept a moderate level of risk for the potential of higher returns.

## Market Comment

October saw further strong gains for global equities. Enhancer assets broadly gained with new record highs sets in the US and European indices. Speculative investment has pushed valuations in US equities to extremes although this is much less the case in the UK, Europe and the Emerging Markets. Anchor assets reversed much of the losses from the end of September as benchmark yields on Gilts fell. This fall was despite increasing inflationary risks and geo-political tensions. We continue to look for an opportunity to tactically increase risk in the portfolio but believe continued patience will ultimately be rewarded. Diversifier assets were mixed as Gold remained fairly static in Sterling terms while property enjoyed strong gains.

## Rivers Asset Classification System:

**"Anchors"**: investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

**"Enhancers"**: selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

**"Diversifiers"**: selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

### Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (March 31<sup>st</sup> 2017)
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (March 31<sup>st</sup> 2017)
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral
