

# Balanced Portfolio

31<sup>st</sup> January 2023

INTELLIGENT INTUITIVE INVESTING

## Investment Objective

The Rivers Balanced Portfolio targets moderate long term returns above inflation, and after fees, at volatility levels considerably below those expected in equities. The portfolio aims to achieve its objective by maximising diversification across a range of assets. The portfolio will be moderately exposed to global equity market cycles. The typical investor seeks capital growth from their investment and can accept a moderate level of risk for the potential of higher returns.

## Market Comment

January was a positive month for nearly all Anchor and Enhancer assets. Anchors benefited from falling benchmark interest rates, which fell in line with inflation expectations, despite continued Central Bank caution. Across Enhancers most regions gained, led by the Emerging Markets, with the UK FTSE100 managing to set new all time highs. Diversifiers had a more varied January with Gold and global real estate both showing strong gains, but in general commodities and UK Real Estate struggled. Overall, it was a positive month for the portfolio. While this was welcomed, risks increased materially. With inflation remaining well above Central Bank targets the portfolio was rebalanced to an underweight tactical asset allocation at the end of the month. The Enhancer allocation was modestly reduced in favour of temporary short duration money market Anchor allocation.

## Rivers Asset Classification System:

**"Anchors"**: investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

**"Enhancers"**: selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

**"Diversifiers"**: selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

## Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using Financial Express data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (June 30<sup>th</sup> 2016).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30<sup>th</sup> 2016).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
