

Cautious Income Portfolio

30th April 2023

INTELLIGENT INTUITIVE INVESTING

Investment Objective

The Rivers Cautious Income Portfolio targets income of 3.5% by diversifying across a broad range of assets with differing return and volatility profiles. The portfolio is expected to maintain real value, net of income, after inflation while minimising the possibility of the investment falling in value. The portfolio may be somewhat exposed to global equity and interest rate market cycles. The portfolio's investment value will fluctuate in the short term, but we would not expect significant falls in value over a sustained period.

Market Comment

During April the portfolio saw modest gains overall with marked differences between regions and asset classes. Within Anchors the positive nominal return from money markets was favoured from any longer duration fixed income exposure. Within Enhancers European Equities led the way with near all-time highs being set in some indices. US equities were led by technology, to which the portfolio is underweight, and suffered in sterling terms as the US dollar depreciated. The worst performance came from any exposure to Emerging markets which reversed all gains year to date. Within Diversifiers the Insurance and Macro funds added value while Gold and Real Assets finished about flat in sterling terms. Looking forward the portfolio remains positioned tactically underweight risk as volatility is expected to continue. Inflation is expected to fall but many leading indicators now point to recession.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr
Rivers Cautious Income	0.6	-0.8	2.1	-3.9	5.8	4.6
IA Mixed 0-35% Shares	0.3	-0.6	1.9	-3.8	1.4	3.1

2023	1.5%	-	-	-	1.5%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (June 30th 2016).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30th 2016).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
