

Cautious Portfolio

31st July 2024

Investment Objective

The Rivers Cautious Portfolio targets modest long term returns above inflation, and after fees, at controlled volatility levels. The portfolio aims to achieve its objective by diversifying across a broad range of assets with moderate return and lower volatility profiles. The portfolio may be somewhat exposed to global equity and interest rate market cycles. The typical investor seeks modest capital growth but must accept that the portfolio's investment value may fluctuate in the short term.

Market Comment

Market volatility increased in July, though losses were primarily concentrated in areas where the portfolio had limited exposure. Benchmark interest rates declined, boosting returns for fixed income assets and Anchor assets overall. Within Enhancers, losses in mega-cap US stocks, stemming from record-high valuations, impacted Developed Market equity indices but had a minimal effect on the portfolio due to low exposure. Equities in other regions, particularly the UK, contributed positively, as did small and medium-cap US equities. In the Diversifiers category, commodities, especially Energy, faced challenges as concerns about declining demand grew. Gold and real estate offset these losses, resulting in a neutral overall impact from Diversifiers. Looking ahead, high valuations in certain sectors and slowing global economic indicators support maintaining an underweight risk allocation.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr
Rivers Cautious	0.60	1.5	5.6	9.5	9.5	22.0
IA Mixed 0-35% Shrs	0.96	2.7	3.1	7.6	-2.2	5.0

2023	1.5%	0.1%	1.8%	3.1%	6.7%
2024	3.8%	1.0%	-	-	4.9%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (June 30th 2016).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (June 30th 2016).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
