

Rivers Cautious Income Portfolio

30th June 2025

Investment Objective

The Rivers Cautious Income Portfolio targets income of 3.5% by diversifying across a broad range of assets with differing return and volatility profiles. The portfolio is expected to maintain real value, net of income, after inflation while minimising the possibility of the investment falling in value. The portfolio may be somewhat exposed to global equity and interest rate market cycles. The portfolio's investment value will fluctuate in the short term, but we would not expect significant falls in value over a sustained period.

Market Comment

Markets continued to recover during June, with many reaching all-time highs. Over the quarter, returns were modest, masking losses following President Trump's 'Liberation Day' on April 2nd and the subsequent strong recovery. Portfolio returns were boosted by increasing risk exposure on April 8th, resulting in a positive first half of 2025. During June the biggest contribution came from the Enhancer (equity) allocation with all positions adding value for the quarter. All Anchor allocations also added value for both the month and the quarter. Diversifiers were more varied with strong performance from Real Estate and Absolute Return in both the month and the quarter offset by negative performance from Insurance and Infrastructure. Looking ahead, we plan to secure profits and reduce risk during July.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr
Rivers Cautious Inc	0.60	3.28	4.33	6.83	13.0	14.6
IA Mixed 0-35% Eqty	1.25	2.20	2.65	4.94	12.0	9.4

Quarterly	Q1	Q2	Q3	Q4	Total
2019	4.45%	2.49%	1.56%	1.05%	9.9%
2020	-12.07%	9.15%	0.74%	5.07%	1.6%
2021	-0.38%	2.32%	0.68%	1.18%	3.8%
2022	-2.03%	-5.86%	-4.19%	2.80%	-9.2%
2023	1.42%	-1.36%	-0.06%	3.99%	4.0%
2024	2.63%	0.66%	2.72%	-0.31%	5.8%
2025	1.02%	3.28%			4.3%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (30/06/2016).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/06/2016).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
