

Rivers Preservation Portfolio

31st August 2025

Investment Objective

The Rivers Preservation Portfolio targets sufficient returns to maintain the real value of the portfolio after inflation. The portfolio aims to achieve this objective by combining assets with lower volatility profiles although modest allocations to higher risk assets may be included if appropriate. The portfolio will be invested primarily in low risk assets which will be anchored to the prevailing risk-free rate of return.

Market Comment

Markets continued to advance in August, with many setting new all-time highs. The largest contributor to performance for the month was the Diversifier allocation, led by the Real Assets allocation and Real Estate. Despite increasing long-term Gilt yields affecting most bond markets the portfolio saw positive returns from all Anchor allocations. The rebalance at the end of July included removing all direct Gilt exposure and replacing with more diversified fixed income allocations. Looking forward, high equity valuations and further increases in the long-term cost of borrowing, globally as well as the UK, are concerning. The portfolio is positioned with those risks in mind but with investor optimism remaining high the portfolio will continue to benefit from further upside.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr
Rivers Preservation	0.33	1.27	3.85	4.06	N/A	N/A
IA Money Market	0.33	1.08	2.99	4.66	N/A	N/A
Bberg Sterling Gilt	-1.06	0.10	1.01	-2.52	N/A	N/A

Quarterly	Q1	Q2	Q3	Q4	Total
2019					-
2020					-
2021					-
2022				2.52%	2.5%
2023	1.66%	-0.31%	1.64%	3.04%	6.1%
2024	0.69%	0.70%	1.99%	-0.25%	3.2%
2025	1.52%	1.58%			3.9%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.15% Rivers Capital Management fee and annualised since inception (30/09/2022).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/09/2022).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
