

Rivers Adventurous Risk Portfolio

31st January 2026

Investment Objective

The Rivers Adventurous Portfolio seeks capital growth, after fees, as its primary objective whilst maintaining a moderate constraint over overall short-term volatility. The portfolio aims to achieve its objective by diversifying across a broad range of global assets with differing return and volatility profiles. The portfolio will be exposed to global equity market cycles. Fluctuations in the value of the portfolio should be expected in order to achieve greater potential returns over the longer term.

Market Comment

2026 began with strong momentum, as nearly all markets posted positive returns in January despite rising geopolitical risks and concerns over debt and valuations. For the portfolio, the Diversifier allocation added the most value, led by Uranium and Gold Miners, which gained over 37% and 18% respectively. All other Diversifier allocations to Macro and Real Assets contributed positively. The Enhancer allocation also performed well, with all allocations positive except one US Equity fund and Indian Equities. Notably, another US Equity fund was the top performer, with other strong gains in Emerging Markets, Japan, and the UK. The Anchor allocation rounded out the month with positive returns, led by the Absolute Return funds. Looking forward, we will be completing a rebalance in February but expect to maintain the overall risk level given continued uncertainty.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr
Rivers Adventurous	4.91	6.36	4.91	21.39	37.1	44.9
IA Mixed 40-85% Eqty	1.63	1.56	1.63	9.76	29.1	33.7
Arc Steady Growth	2.13	1.62	2.13	7.95	25.0	28.4

Quarterly	Q1	Q2	Q3	Q4	Total
2019	5.68%	3.91%	2.14%	0.32%	12.5%
2020	-10.06%	15.77%	2.55%	4.93%	12.0%
2021	-0.20%	4.32%	0.62%	2.08%	6.9%
2022	-2.37%	-6.92%	-0.71%	4.78%	-5.4%
2023	1.78%	-0.63%	1.52%	4.50%	7.3%
2024	4.48%	1.45%	1.23%	-1.34%	5.9%
2025	-0.10%	5.94%	8.36%	4.13%	19.4%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

1. The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (30/06/2016).
2. Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/06/2016).
3. The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
4. The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
5. The yield is the average yield as published by each fund and not guaranteed.
6. Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
7. Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
