

Rivers Adventurous Risk Portfolio

30th June 2026

Investment Objective

The Rivers Adventurous Portfolio seeks capital growth, after fees, as its primary objective whilst maintaining a moderate constraint over overall short-term volatility. The portfolio aims to achieve its objective by diversifying across a broad range of global assets with differing return and volatility profiles. The portfolio will be exposed to global equity market cycles. Fluctuations in the value of the portfolio should be expected in order to achieve greater potential returns over the longer term.

Market Comment

Asset returns were mixed during June. On the positive side, a resolution to the Iran conflict was agreed and the SpaceX IPO, the largest in history, was completed successfully. On the other hand, expectations for interest rate cuts diminished and investors began questioning valuations of US mega-cap stocks. For the portfolio, Enhancer assets added the most value overall, led by positive returns from Japanese, European and US Value equities. Anchor assets were positive as long-term bond valuations increased. Diversifiers struggled for the month, with falls in gold and oil prices weighing on gold miners and energy-related positions, while Healthcare became the best performing position in the portfolio, it nonetheless failed to offset losses overall. Looking forward, the portfolio remains underweight risk with a focus on diversification and equities with more favourable valuations.

Performance (%) ¹	1m	3m	YTD	1yr	3yr	5yr	10yr
Rivers Adventurous	-0.39	5.18	6.87	20.57	43.3	40.7	119.7
IA Mixed 40-80%	0.52	9.47	7.62	17.05	38.2	32.4	95.8
MPS 65%-85%	0.90	10.83	9.50	19.84	41.6	38.0	115.6

Quarterly	Q1	Q2	Q3	Q4	Total
2020	-10.06%	15.77%	2.55%	4.93%	12.0%
2021	-0.20%	4.32%	0.62%	2.08%	6.9%
2022	-2.37%	-6.92%	-0.71%	4.78%	-5.4%
2023	1.78%	-0.63%	1.52%	4.50%	7.3%
2024	4.48%	1.45%	1.23%	-1.34%	5.9%
2025	-0.10%	5.94%	8.36%	4.12%	19.4%
2026	1.61%	5.18%			6.9%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

- The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (30/06/2016).
- Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/06/2016).
- The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
- The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
- The yield is the average yield as published by each fund and not guaranteed.
- Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
- Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
