Rivers Cautious Risk Portfolio

31st July 2026

Investment Objective

The Rivers Cautious Portfolio targets modest long term returns above inflation, and after fees, at controlled volatility levels. The portfolio aims to achieve its objective by diversifying across a broad range of assets with moderate return and lower volatility profiles. The portfolio may be somewhat exposed to global equity and interest rate market cycles. The typical investor seeks modest capital growth but must accept that the portfolio's investment value may fluctuate in the short term.

Market Comment

Investment markets were volatile during July. Overall, the portfolio was modestly positive for the month, but diversification was key as returns varied by asset type, region and strategy. The best-performing asset type was Diversifiers, which saw strong gains from Real Assets and Macro, though partially offset by smaller losses in Infrastructure and Healthcare. Among Enhancers the month was flat overall, as losses in US, Emerging Market and Japanese equities were offset by gains in Global Value, European and UK equities. Within Anchors, rising gilt yields caused losses, although these were offset by asset-backed debt and absolute return funds. Looking forward, equity valuations, together with uncertainty over energy prices and debt, give us cause for concern. Our current allocation, with a value bias and broad diversification, remains appropriate.

Performance (%)[1]	1m	3m	YTD	1yr	3yr	5yr	10yr
Rivers Cautious	0.17	2.36	4.23	11.35	28.8	28.8	72.9
IA Mixed 0-35%	-0.68	1.69	2.75	6.53	20.7	9.7	30.6
MPS 30%-45%	-0.63	2.63	4.47	8.68	25.3	18.4	51.2

Quarterly	Q1	Q2	Q3	Q4	Total
2020	-6.49%	10.55%	1.30%	3.42%	8.3%
2021	-0.58%	2.50%	0.87%	1.45%	4.3%
2022	-1.56%	-5.41%	-0.89%	3.69%	-4.3%
2023	1.54%	0.15%	2.06%	3.15%	7.1%
2024	3.90%	1.06%	0.85%	-0.54%	5.3%
2025	0.29%	3.97%	5.32%	3.13%	13.3%
2026	0.47%	3.57%			4.2%

Rivers Asset Classification System:

"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.

"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.

"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:

1. The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.25% Rivers Capital Management fee and annualised since inception (30/06/2016).
2. Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/06/2016).
3. The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
4. The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
5. The yield is the average yield as published by each fund and not guaranteed.
6. Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
7. Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
