Rivers Preservation Portfolio

31st October 2026

Investment Objective

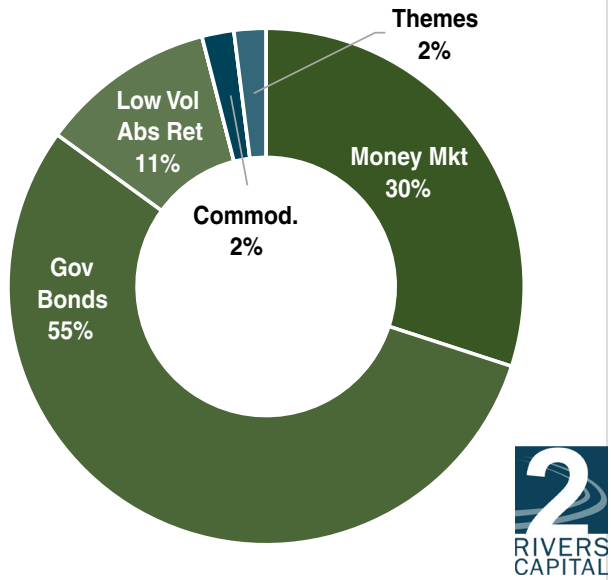

The Rivers Preservation Portfolio targets sufficient returns to maintain the real value of the portfolio after inflation. The portfolio aims to achieve this objective by combining assets with lower volatility profiles although modest allocations to higher risk assets may be included if appropriate. The portfolio will be invested primarily in low risk assets which will be anchored to the prevailing risk-free rate of return.

Market Comment

In October market volatility remained high as concern regarding AI equity valuations and debt escalated and energy prices increased further. Overall, the portfolio was positive for the month. Within Anchors, gilts rallied as yields fell, with money market, short duration bond, financial credit and absolute return bond funds also contributing. The cash and near cash allocation continues to outperform inflation. The Diversifier allocation detracted as gold fell sharply, more than offsetting a gain from Healthcare. Enhancers remain tactically set to zero weighting as volatility remains high. The portfolio maintains a short duration bias and broad diversification which remain appropriate given the uncertainty ahead.

Model Characteristics	Target	Current
Annualised Return[1]	3.5%	4.8%
Portfolio Volatility[2]	<4%	1.9%
Maximum Loss[3]	<4%	-1.2%
Ongoing charge of underlying[4]	<0.30%	0.27%

2024	0.69%	0.70%	1.99%	-0.25%	3.2%
2025	1.52%	1.58%	1.23%	1.50%	6.0%
2026	0.06%	1.58%	-0.01%		2.0%

Rivers Asset Classification System:
"Anchors": investments selected for low market correlation, low risk and capital preservation core characteristics. Significant allocation in low risk portfolios.
"Enhancers": selected to increase portfolio long term return but exposed to equity risk. Allocation likely to increase with risk tolerance as returns become more volatile.
"Diversifiers": selected for low correlation to traditional market equity and fixed income risk. Diversifiers are essential for efficiency in all but the lowest and highest risk portfolios.

Notes:
1. The performance data shown is indicative only. Rivers Capital Management attempts to replicate accurately the performance of the underlying portfolio using composite fund data but performances will likely differ from individual accounts due to inflows and timing issues. The performance is net of a 0.15% Rivers Capital Management fee and annualised since inception (30/09/2022).
2. Volatility is calculated as the annualised average weekly standard deviation of return since inception (30/09/2022).
3. The maximum loss is calculated as the total loss from the highest previous month end portfolio value. Intra month or daily data may exceed this.
4. The ongoing charge is based on the current portfolio weightings using the latest available OCF data of each fund.
5. The yield is the average yield as published by each fund and not guaranteed.
6. Rivers investment committee determines a Passive allocation target (20-60%) dependant on the perceived market opportunity.
7. Relative risk level determined between 1 and 7 within the tactical constraints of all models with a level 4 considered tactically neutral.
